Education

2021.09~Present, PostDoc Fellow, Center for Mind and Brain, University of California, Davis, US.
Supervisor: Prof. Steven Luck.

2018.11~2021.08, Ph.D. Mathematical Information Technology, Faculty of Information Technology, University of Jyväskylä, Finland.

Supervisor: Prof. Timo Tiihonen and Prof. Fengyu Cong.

Thesis: Methods to Extract Multi-dimensional Features of Event-related Brain Activities from EEG Data

2015.09~2018.06, M.E. Biomedical Engineering, School of Biomedical Engineering, Faculty of Electronic Information and Electrical Engineering, Dalian University of Technology, China.

Supervisor: Prof. Fengyu Cong.

Thesis: The Research on Extracting Quasi-time-locked and Non-phase-locked Brain Activity from Event-related Potential Data

2011.09~2015.06, B.E. Communication Engineering, School of Information Science and Engineering, Dalian Polytechnic University, China.

Research Interest

Current research: Studies on developing advanced techniques in extracting event-related potentials (ERPs)/event-related fields (ERFs) from electroencephalogram (EEG)/MEG (magnetoencephalography) data. Aiming to the realization of multi-functional software toolboxes, which mainly concerned on:

1. ERP/EEG/MEG.
2. Spectral analysis: Fourier, Hilbert, and wavelet transforms.
3. Time-frequency analysis: Morlet continuous wavelet transform, short-time Fourier transform (STFT), Hilbert transform, matching pursuit algorithm, etc.
4. Matrix decomposition: Nonnegative matrix factorization (NMF), principal component analysis (PCA), and independent component analysis (ICA)
5. Tensor decomposition: Tucker decomposition (TD) and canonical polyadic decomposition (CPD)
6. Statistical analysis: ANOVA, etc.
7. Other: ERPLAB development, Decoding analysis, Representational similarity analysis, etc

Matlab Toolbox

Name: Evoked ERP/EROv1.1 (from: <http://zhangg.net/publications/>).

Data type: Trial-averaged ERP data are collected from either the within-subject (one-factor, two-factor, three-factor) or between-subject (two-factor, three-factor) experimental designs.

Method: Conventional time-domain analysis, FFT, wavelet filter, time-frequency analysis, and PCA.

Academic activities

The 7th Annual Research Seminar of CIBR. December 11, 2019. Jyväskylä, Finland

MEG Nord 2019, May 8 ~ 10, 2019. Jyväskylä, Finland.

The 13th Chinese Intelligent Systems Conference, October 14~15, 2017, Mudanjiang, Heilongjiang, China.

Symposium of Liaoning Neuroscience Society, October 14~16, 2016, Shenyang, China.

The 3rd Symposium on brain imaging and EEG research and Application, July 16~19, 2016, Dalian, China.

Research funding

Chinese Government Scholarship, from China Scholarship Council, 2019.03 ~2021.08 (1350Euros/month).
